## PRIZES

- OCT 2015 **Instagram solution for Copenhagen Municipality.** During KEA Week, we developed a concept for Københavns Kommune (Copenhagen Municipality) to help foreign tourists navigate and find attractions easily in the city of Copenhagen.  
Our idea was simple: We use Instagram, and by tagging events, pictures and users on the map, it's easy for tourist to find on their preinstalled app. Our group won and got invited to continue working with the client.
- MAR 2014 **Campaign for Danske Bank.** As a part of the MMD education we had to choose a bank package at Danske Bank that we wanted to promote. We had to come up with a suggestion to how we could attract young people and come up with an idea for a decoration for the bank. Danske Bank chose our group and proposals as one of the best out of the forty groups we were.
- DEC 2013 **Digital web concept for Lakrids.** As a part of the MMD education we were given the assignment to develop a concept for Lakrids by Johan Bülow (Liquorice by Johan Bülow). It should sensory link the stores to a digital platform. Our group won out of 26 groups and was offered a future collaboration with the company.

- Team player

I often become closely involved with my work, and I always take a challenge up independently as well as a group. In a group, I'm good at taking responsibility, being flexible according to the distribution of tasks and listen to suggestions.

By nature I'm incredible tidy, which is often

reflected in my precision and accuracy. I like being organized and keeping track – even in stressful situations.

I'm a creative soul and I love creating something out of nothing. Whether it concerns graphics, drawings, videos, music, etc.
